Sealmatic Shines At The Turbomachinery & Pump Symposium 2025 In Houston, Texas, USA

The state of Texas has long been recognized as the beating heart of America's oil and gas industry. With its vast reserves, extensive refineries and concentration of energy companies, Texas plays a defining role in powering the United States and other global markets. At the very center of this energy powerhouse is the city Houston, often called the "Energy Capital of the World."

The Turbomachinery & Pump Symposium (TPS) one of the most respected global events in USA mainly dedicated to pumps, compressors, turbines and other rotating equipment, is hosted year after year. For Sealmatic, this exhibition is far more than a platform to showcase mechanical seals; it represents an opportunity to engage directly with the world's leading OEMs, decision-makers and key stakeholders, who influence the course of the oil, gas, petrochemical and energy industries.

TPS 2025 marked the third consecutive participation for Sealmatic and once again the response was truly remarkable. Our stand was strategically located at the center of the exhibition, surrounded by leading OEMs of pumps, compressors and other rotary equipment manufacturer, thus; ensuring a stream of relevant and high-quality visitors. The display of cut models of advanced mechanical seals, which allowed visitors to gain first-hand insights into the engineering precision, reliability and innovation that define Sealmatic products.

It became a focal point of technical discussions with OEMs and industry experts, further reinforcing the trust in our sealing solutions. The success of Sealmatic at TPS 2025 reflects the strength of our products and our commitment to being a global player in mechanical sealing solutions.
